House Panel Approves Bill to Release Kennedy Assassination Documents

The House Judiciary Subcommittee on Economic and Commercial Law unanimously approved legislation yesterday to release Government records dealing with the assassination of President John F. Kennedy. The bill would set up a review board to examine all the Government material and recommend what should be released. The mountain of secret material, held by Congress, Federal agencies, libraries and archives, contains everything from autopsy photographs and top-secret intelligence reports to newspaper clippings and tax returns. The stacks of records shown above were processed by the Federal Bureau of Investigation.
